24	Assignments	Project 1: Create a simple chatbot that will talk to a LLM and then give you answers. You can use Gemini model. Gemini API key is free to use. Build a UI with any framework of your choice. Build a backend using Python (Langchain framework).	Project - 1	2 days	TBD	TBD
25	Assignments	Project 2: The next step is to add a DB layer. Use Postgresql DB. Store the chats into the DB. Get a login for Amzur employees. After login, load all the chats that has been stored in the DB into the chat window.	Project - 2	2 days	TBD	TBD
26	Assignments	Project 3: Allow login with google. Allow chat threads to be created/updated/deleted. Auto assign chat thread names for every thread. Load the threads on login.	Project - 3	2 days	TBD	TBD

27	Assignments	Project 4: Allow every chat to have a memory of 5 previous conversations. That is, the chat should remember the previous 5 conversations in the chat before answering	Project - 4	2 days	TBD	TBD
28	Assignments	Project 5: Allow the chat window to input images, videos, tables, formulas, code as attachments	Project - 5	2 days	TBD	TBD
29	Assignments	Project 6: Allow the chat to create images. Use Google gemini 2.0 Image Generation model	Project - 6	2 days	TBD	TBD
30	Assignments	Project 7: Upload a file into the chat and chat about the file. Lets start with PDF. Use RAG framework. Use ChromaDB for vector storage, OpenAI Embeddings Large for embeddings	Project - 7	2 days	TBD	TBD
31	Assignments	Project 8: Connect to a Database and ask questions in natural language. It could be any questions that typically asked as a SQL statement.	Project-8	2 days	TBD	TBD
32	Assignments	Extend the DB task to include excel file or GSheet and ask questions based on the excel file	Project 9	2 days	TBD	TBD
33	Assignments	Have a set of rules and have a set of images. Check if the images are as per rules. This is about data extraction from image and checking against the rules	Project 10	2 days	TBD	TBD
34	Assignments	Agents: Understand everything about agents. Learn and create a basic agent based on a LLM using Langchain	Project 11	2 days	TBD	TBD
35	Assignments	Agents: Create agent to play a game of tic tac toe using Langchain	Project 12	2 days	TBD	TBD
36	Assignments	Agent with MCP example	Project 13	2 days	TBD	TBD
37	Assignments	Create agents with N8N	Project 14	2 days	TBD	TBD
